The Cherner Chair Company

**METAL BASE SIDE CHAIR**

The metal base side chair by Norman Cherner is the less formal version of the classic Cherner wood base chair. Metal base chairs have seats made of laminated plywood of graduated thickness and bright chrome bases. Available with upholstered pads. Stackable. Reissued from the original drawings, the Metal Base Side Chair is strong, lightweight and made in the U.S.A

Designed by Norman Cherner 1958

**Seat Pad Options:**

Cherner seating products can be ordered with seat pads or seat and back pads. Pads are comprised of molded plywood forms padded with 3/4" of foam and wrapped with one of the following options: customer's own material (COM), Maharam Fabric, or Spinneybeck leather.

Seat pads must be installed at the factory and must be ordered at the same time as chairs or stools. Seat pads cannot be purchased separately or installed on previously purchased chairs.

**Natural**

"Natural" finishes have a clear top coat where the natural variations in the color and the grain of the wood are clearly visible. No stain or color enhancements are used. Seating products with a "Natural" finish include: Beech, Red Gum and Walnut.

**Classic**

Aniline dyes and water-based low VOC varnishes are used to produce a finish where the natural grain texture of the wood is clearly visible with uniform color throughout. Classic color finishes are: Walnut, Ebony or Stella Orange.

**Lacquer**

Products with a lacquer finish are smooth to the touch with a uniform color with no wood grain visible. There are no natural variations in color or texture. Lacquer finishes are available in Ebony or White.
