

GUBI

3D DINING CHAIR

One of GUBI's most innovative products, the GUBI Chair, is designed by Boris Berlin and Poul Christiansen of Komplot Design. The GUBI Chair is the first furniture design to be based on the innovative technique of moulding three-dimensional veneer. The 3D design gives the chair a comfortable seat and sense of lightness - with all edges pointing away from the user. Due to this ground breaking technology, the thickness of the veneer is allowed to be reduced to half than normally used. The GUBI chair was designed in 2003 and has won several prestigious design awards and is included in the permanent exhibition at the Museum of Modern Art (MoMA) in New York.

Design by Boris Berlin and Poul Christiansen

DIMENSIONS 540 W x 540 D x 800 H / 450 SH
