## EASEL DINING TABLE

a minimal top, in crystal, canaletto walnut veneer or marble, suspended on two independent wood structures: the result is a very refined table, thanks to the elegant details and the lightweight look of the piece overall. easel, designed for driade by ludovica+roberto palomba, is a table that plays on proportions and dynamism. available in three different lengths (220, 240 and 270 cm), with a structure in canaletto walnut or solid ebonized ash wood, this table is perfect for any room, from classic to contemporary styles. this elegant piece of furniture has a transparent, airy look.

"we learnt the word easel in south africa, a country that we love and from which we have taken inspiration for our projects. this element has always fascinated us for its dual nature. each easel is a bit like each of us, it needs another to be really useful." ludovica + roberto palomba
